MX Entreprise™

Digitize, Secure, and Enhance Your HR Processes

MX Enterprise™ is a fully integrated solution for Human Resources management. It covers all operational and strategic HR processes, including: personnel administration, payroll management, time and activity tracking, as well as talent management and development. MX Enterprise™ is a complete, modular, highly configurable, and user-oriented solution designed for private sector companies and public sector organizations.

With its extensive functional coverage and high-performance full-web architecture, based on the latest market technology standards, MX Enterprise™ combines security, performance, innovation, and operational cost control.

MX Enterprise™ includes the following solutions:

MX Attendance ™

A modular, integrated solution that covers all functions related to automating time management and activity tracking.

MX Access™

An integrated solution for the digitalized and centralized management of access control and associated flows, ensuring proactive and efficient control of the entire security system for institutions across all sectors.

MX Payroll™

A comprehensive solution for optimal and reliable payroll management. It incorporates a powerful configuration capability to handle even the most complex payroll rules, adapting flexibly to legal and social regulations.
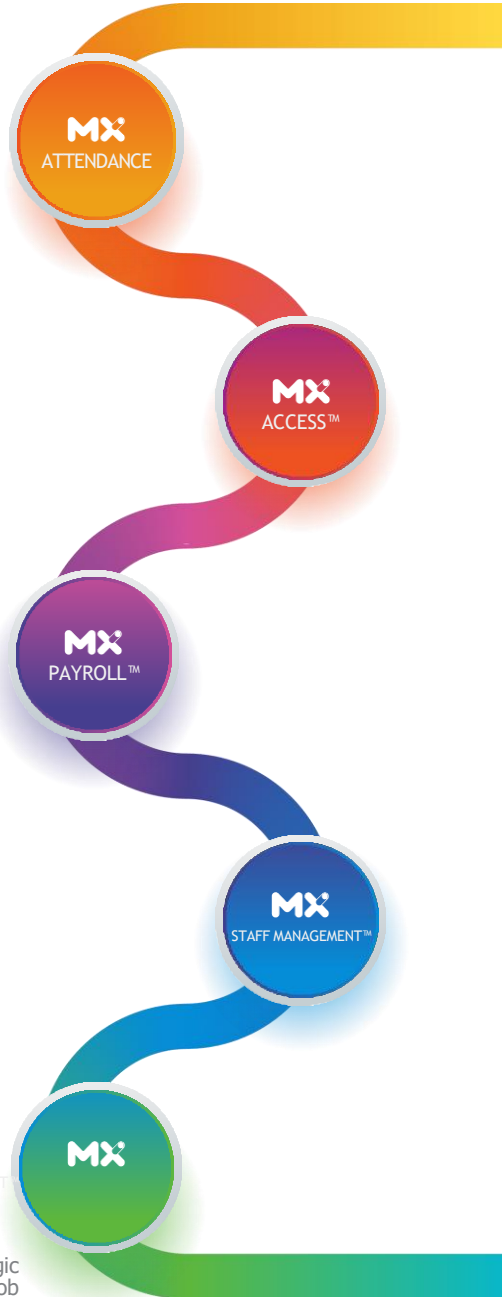

MX Staff Management™

A solution dedicated to industrialized administrative management. It handles every HR event in the employee lifecycle, from recruitment to retirement, generating the associated procedures in compliance with legal requirements and changes.

MX HR Development™

A complete, modular solution dedicated to the strategic development of human resources, including: job management, skills management, talent management, performance evaluation, career management, recruitment, training…
