

Case study – Mohammed VI Polytechnic University, Morocco

Multi-service student cards issuing platform

Context

Mohammed VI Polytechnic University has entered the “all-digital” era, and is convinced that the convergence **of intra-campus services**, accessible with a **single card**, brings **added value** to the university's operations.

Objectives

The aim of the project was to **set up a program of Multi-service Campus cards** for students, faculty and administrative staff, providing **identification**, **access** to university **services** and **infrastructures**, and other **value-added services**.

M2M Group's response

At the heart of this dynamic, **M2M Group**, editor and operator of benchmark universal technologies for over 35 years, has been selected to deploy one of the first innovations in the world of education: **a solution of Multi-services Campus cards** linked to **payment accounts**. Usable both **on and off campus**, the Student Multi-services card combines a **prepaid card** for payments and withdrawals with a **mobile application** for instant top-ups, money transfer, consultation and set-up operations.

In addition to its technological finance functions, the card **integrates numerous applications** for **identification** and **access** to a range of dematerialized services: **access control** (to the university, lecture halls, laboratories, halls of residence, restaurants), **e-signature at exams**, **library borrowing**, meal **reservation** and **payment**, access to **online administrative services** (certificate requests, transcripts, exam calendars, etc.)....

Benefits for the University and students

This program has made daily life easier for students, enabling them **to receive money transfers from parents and university scholarships** directly on their cards, giving them all the advantages of **instantaneity, autonomy** and **security**, with no risk of overdraft.

+5 Campuses

+14 Establishments

+25 Research Fields

Solution technologies

Through this platform, the university is equipped with solutions for **managing student cards, distributing scholarships, managing dematerialized services and flows, and monitoring** the program using latest-generation analytical and decision-making tools.

Access Control

Presence Control

Booking classes & Accommodation

Exam Registration

Scholarship Management
